CACI *ultra*

FACIAL TONING & SKIN REJUVENATION

CACI has a solid celebrity following and our two favourite Jens are just to name a couple of them. The beautiful JENNIFER LOPEZ and the ever gorgeous JENNIFER ANISTEN, now you know their ever youthful secret!

The multifunctional CACI Ultra is the ultimate treatment system, combining the lifting function of the award winning CACI non surgical facial toning system with the skin regenerating applications of the world acclaimed Futur-Tec system. CACI Ultra wrinkle comb handset combines diode photo simulation with high frequency micro current, the synergy of these two technologies effectively plumps and softens lines, wrinkles and stretch marks thereby providing a non invasive alternative to collagen injections and other chemical fillers.

The CACI Ultra system incorporates 4 different technologies within one state of the art treatment device:

- Micro current
- Ultrasound
- High frequency
- Diode photo simulation

The micro current phase uses a combination of specific waveforms and frequencies that work in harmony with the body's own bio--electrical field. Tiny electrical impulses are transmitted through soft cotton tipped probes designed to re-educate and tone muscles and enhance skin tissue repair. The use of unique serum filled electro buds accelerates the micro current treatment results.

It is recommended that initially you have a course of 10 treatments, 2 per week, then go to a maintenance of once a month.
